

# ClippaNet – the Easy-Pak machine

- Versatile and easy to operate
- Available with label applicator
- Suitable for a wide range of products
- Easy-load clip wire on cassette
- Comprehensive after-sales support

# ClippaNet

The Easy-Pak machine is the latest in semi-automatic clipping machinery from ClippaNet. Suitable for packing a wide range of products in either jumble packs or in-line packs, the Easy-Pak machine can accommodate net tubes to suit a variety of nets, both knitted and extruded.

The Easy-Pak machine is supplied for use with a 220V/1/50Hz electrical power supply. It can also be supplied with an applicator for 120mm or 160mm x 40mm wide pre-printed wineglass labels. Clips are automatically formed from clip wire dispensed from a twin wire cassette. Product feed can be manual or direct from a counting or weighing machine. The machine can also be installed in conjunction with a feed conveyor to over-net punnets of produce for occasional or medium throughput use. It is also suitable for netting manufactured products such as flexible ducting.

For further details about the Easy-Pak machine and the general range of machinery available contact:
